- Research on Natural immunity vs Covid-19 vaccine-induced immunity  
Summary statement: *Should people who have recovered from COVID take a vaccine?*  
Epidemiology, immunology and the clinical data all say a clear “No!”. There is no good reason to vaccinate the recovered.

- Professor Sucharit Bhakdi, M.D. (Significant concerns about the safety of the mRNA vaccines. There are mechanisms at work that could produce adverse effects long term, and because of the rush to distribution, there has not been a “long term” available to rule out these effects.)

\*\*\* [Note: Starting at about 2:17 in this video clip there is a discussion of how the material in the injections distribute throughout the body. One very concerning fact that has been learned is that the lipid nanoparticles from the vaccine tend to concentrate in the ovaries. This raises serious concerns about reproductive harm.] \*\*\*
